

Blackseal

Waterborne rubber co-polymer modified bitumen emulsion membrane.

DESCRIPTION

Crommelin[®] Blackseal is a commercial grade, waterborne bitumen emulsion modified with a synthetic rubber co-polymer to provide excellent waterproofing properties and good flexibility.

FEATURES AND BENEFITS

- Quick drying.
- Flexible.
- Non-Flammable.
- Remains watertight under permanently wet conditions.
- Strong adhesion.

AREAS OF USE

Blackseal is suitable for use in the following areas:

- Non-UV Exposed Areas.
- Retaining Walls.
- Planter Boxes.
- Timber Posts.
- Interiors of Pots.

Note: Not suitable to be painted or tiled over.

SUITABLE SUBSTRATES

Blackseal is suitable for use on the following surfaces:

- Concrete.
- Plywood.
- Cement Render.
- Timber.
- Brick.
- Fibre Cement Sheet.
- Light Weight Aggregate Block.
- Steel.

APPLICATION TOOLS

- Crommelin[®] Contractor Membrane Applicator Brush – 100mm, 75mm.
- Crommelin[®] Contractor Membrane Roller Cover – 230mm.
- Airless spray.

SURFACE PREPARATION

Full surface preparation instructions can be found at www.crommelin.com.au/full-instructions/

- The surface should have a light even texture. Masonry should be flush pointed and all defects in existing surfaces made good.
- **Surfaces must be clean**, dry, sound and free from dust, grease, curing compounds, release agents, loose particles, efflorescence, concrete laitance or any other contaminants.
- All high points and protrusions should be removed, blow-holes and areas of honeycombing should be filled and the surface should be brought back to an even profile using a suitable repair mortar.
- Install a fillet of 1 : 3 cement and sand at all internal masonry angles.
- **All surfaces must be dry**. A moisture test is required 100% of the time to ascertain if the substrate is dry enough to coat. Electronic moisture meters are recommended.
- If substrate is not dry, prime surface with **Crommelin[®] Dampstop** as per specifications.

PRODUCT PREPARATION

- **Blackseal** is ready to use, simply stir well prior to application.

APPLICATION CONDITIONS

- Do not apply if surface/ambient temperatures are too high or too low. Recommended temperature range 10⁰c - 35⁰c.
- Do not apply if humidity is too high, or likely to be during the initial cure phase. Maximum recommended humidity during application and cure is 85%.
- Weather details may be checked at <http://www.bom.gov.au>.

APPLICATION PROCESS

Full application instructions can be found at www.crommelin.com.au/full-instructions/

- Apply only to substrate positive side (i.e. to prevent moisture entering the substrate).
- Prime area with one coat of 1:5 dilution of **Blackseal** and water. Allow to dry.
- Silicone bond breaking sealant to all joints, junctions, protrusions, angles and internal corners must be used.
- The use of **Crommelin[®] Reinforcing Fabric** is required on all areas where movement may occur, and all areas treated with silicone sealant, installed as part of the first coat as per fabric installation instructions.
- Apply first coat evenly, as per recommended coverage rate and allow to dry.
- Recoat when touch dry (membrane will turn from brown to black)
- Apply second coat evenly, at 90° (right angles) to first coat and allow to dry.
- Ensure membrane is protected from damage and suitable protection board installed before any back filling.
- **Note: Do not use Blackseal in conjunction with polyurethane or hybrid sealants.**

RE-COAT/DRYING TIME

- Recoat time: 1 hour.
- Backfill: Minimum 72 hours.
- Full cure: 7 days.
- Ensure good airflow to optimise membrane cure time.
- Do not expose to moisture until full cure is achieved.

COVERAGE

- 1.5m² per litre, per coat.
- Minimum 2 coats required.

CLEAN UP

- Clean all equipment with water before product dries.

SIZES

Blackseal is available in 20L pails.

- 20L will produce approximately 15m² of finished coating.

RELATED PRODUCTS

- Crommelin[®] Moisture Meter.
- Crommelin[®] Contractor Membrane Applicator Brush – 100mm, 75mm.
- Crommelin[®] Contractor Membrane Roller Cover – 230mm.
- Crommelin[®] Dampstop.
- Crommelin[®] Reinforcing Fabric.
- Crommelin[®] Silicone WP Plus.

PRECAUTIONS

- Ensure substrate is completely dry before application.
- Ensure adequate surface preparation is carried out to allow even application.
- Ensure a trial patch is applied to ensure suitability and desired result is achieved.
- Ensure any existing coatings are compatible or removed prior to application.
- Do not apply during periods of extreme weather conditions – temperature or humidity. Apply between 10⁰c and 35⁰c and less than 85% humidity. To check these conditions, refer to <http://www.bom.gov.au>
- Do not use Blackseal in conjunction with polyurethane or hybrid sealants.

TRANSPORT AND STORAGE

- | | | | |
|------------------|--------------------------|------------------------|-------------------------|
| • Size: 20L / 4L | • Weight: 21.5kg / 4.1kg | • Cool and Dry Storage | • UN Number: N/A |
| • DG Class: N/A | • Flash Point: N/A | • Hazchem Code: N/A | • Poisons Schedule: N/A |

SAFETY AND FIRST AID

Crommelin[®] Blackseal Safety Data Sheet is available from Crommelin[®] upon request.

Safety

- Ensure good ventilation and avoid breathing vapours.
- Avoid skin and eye contact. Wear gloves and eye protection. Remove splashes on skin immediately and remove contaminated clothing.
- Keep out of reach of children.
- Keep container sealed when not in use.
- Do not swallow.

First Aid

- If poisoning occurs, contact a doctor or poisons information centre: Ph. 13 11 26.
- If swallowed, do not induce vomiting. Give a glass of water to drink.
- If in eyes, hold eyes open and flood with water for at least 15 minutes.
- If not breathing, apply artificial respiration.
